Key points

- It is a really good idea, very useful.
- But I am worried about privacy, who will see my location data?
- I can pay around 1500 rupees for the device, and maybe 99 rupees a month for the service.
- More than 3000 a year is too expensive for me.
- You should add a feature for two-wheelers, like a helmet sensor.
- Right now I use Google Maps location sharing with my wife.

> ₹3,000	per year	Too expensive	“More than 3000 a year is too”

Suggestions & feature requests

Feature requests	You should add a feature for two-wheelers, like a helmet sensor.
Feature requests	Also there should be an SOS button.
Suggestions	It would be better if it also connects with my insurance company.

Concerns & objections

Privacy concerns	But I am worried about privacy, who will see my location data?

Offers of help

Promises	Sure, I can also connect you with my friends who run a taxi fleet.

What they use today

Family location apps (Life360, Find My) · Google Maps / navigation apps

Questions and answers

INTERVIEWER ASKED	CUSTOMER ANSWERED
How do you usually travel?	I drive my own car to office every day, and on weekends I ride my bike.
Have you ever been in an accident?	Yes, two years ago I had a bike accident on the highway, I got a fracture and nobody helped for almost 40 minutes.
What do you think about this idea?	It is a really good idea, very useful. But I am worried about privacy, who will see my location data?
Would you use it?	Yes, I would use it, especially on my bike.
How much would you pay for it?	I can pay around 1500 rupees for the device, and maybe 99 rupees a month for the service. More than 3000 a year is too expensive for me.
Anything else you would like to see?	You should add a feature for two-wheelers, like a helmet sensor. It would be better if it also connects with my insurance company. Also there should be an S

6. Concerns and follow-up

Negative responses

- **Ravi Kumar**: I am absolutely appalled, thoroughly disgusted, and completely horrified by this entirely atrocious concept.; This is, without a single shadow of a doubt, the most disastrous, t absolute nightmare to even imagine having such a pathetic, invasive device in my vehicle.; I would gladly pay a premium just to keep this hideous, repulsive garbage far away from me.; F TRATA sounds exquisitely terrible, horribly unreliable, and miraculously useless!; It is incredibly offensive and absolutely insulting that TRATA is utilizing such invasive, creepy, and broken
- **Suresh Yadav**: अगर मैं सच कहूँ तो यह अब तक का सबसे घटिया, बकवास और बेवकूफी भरा आईडिया है।; मुझे तुम्हारी इस फालतू तकनीक पर रत्ती भर भी भरोसा नहीं है।; यह एकदम बकवास और बेकार का कॉन्से बहुत बड़ा और भयानक खतरा है।; यह पूरी तरह से एक निराशाजनक, फालतू और बकवास प्रोजेक्ट है।; मेरी तुम्हें यही सलाह है कि इस बकवास काम को तुरंत बंद कर दो क्योंकि यह पूरी तरह से एक कचरा आईडिया है

Follow-up candidates (not clearly positive)

- Suresh Yadav · Independent · -0.92

Appendix: transcript or notes

> Interviewer: Hi, thanks for your time. We are building Trata, a sensor for your car that detects a crash automatically.
> Interviewer: It then calls an ambulance, alerts nearby cab drivers and sends your live location to your family.
> Interviewer: How do you usually travel?
> Customer: I drive my own car to office every day, and on weekends I ride my bike.
> Interviewer: Have you ever been in an accident?
> Customer: Yes, two years ago I had a bike accident on the highway, I got a fracture and nobody helped for almost 40 minutes.
> Interviewer: What do you think about this idea?
> Customer: It is a really good idea, very useful. But I am worried about privacy, who will see my location data?
> Interviewer: Would you use it?
> Customer: Yes, I would use it, especially on my bike.
> Interviewer: How much would you pay for it?
> Customer: I can pay around 1500 rupees for the device, and maybe 99 rupees a month for the service. More than 3000 a year is too expensive for me.
> Interviewer: Anything else you would like to see?
> Customer: You should add a feature for two-wheelers, like a helmet sensor. It would be better if it also connects with my insurance company. Also there should be an SOS button. Right no
> Interviewer: Thank you so much.
> Customer: Sure, I can also connect you with my friends who run a taxi fleet.

Method and accuracy

Sentiment is read from each saved transcript or note by Fieldnotes' built-in rules for English, Hindi and Hinglish. The score runs from −1 (very negative) to +1 (very positive). The simple average gives every c
from what customers said about each topic.

Accuracy note: sentiment is an estimate, and audio results also depend on transcription quality. Review the transcript against the original recording before making decisions.
